

Key points
of difference of
Vetlife
dairy services

Who is Vetlife

- Vetlife is a South Island-owned, mixed veterinary practice with clinics from North Canterbury to North Otago and now in Central Otago.
- Vetlife employs highly skilled people and provides personalised services.
- Vetlife has a proactive approach to veterinary medicine believing in promoting increased health and productivity through advisory and preventative care.
- Vetlife offers 24 hour emergency services.

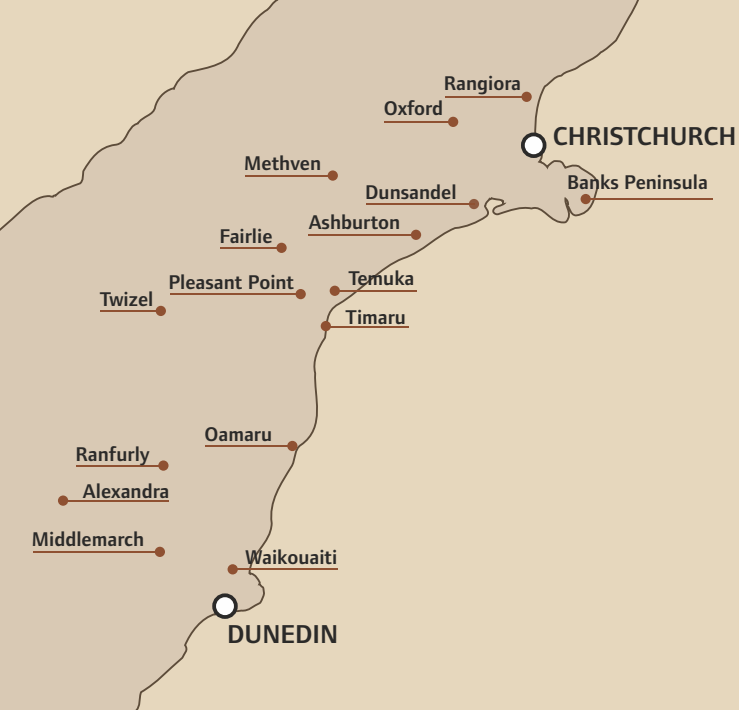

Some of the services Vetlife offers

- Weekly scheduled visits in spring.
- Field representatives provide scheduled weekly visits to top up PARs and seasonal product supplies.
- Extremely skilled technicians for tech jobs at tech rates.
- One of the few national pilot MOU partners to DairyNZ.
- A dairy nutritional advisor who provides special fodderbeet services.
- Large-scale purchasing power.
- Regular roadshows covering informative and practical topics.
- Excellent newsletters written by our Vetlife vets for our clients.
- PDA data entry into MINDA and data analysis and reporting e.g. MINDA permitted access with analysis (milk quality and reproduction).
- Farm budget advice and management for animal health costs.
- Bench-marking of animal health costs for individual farms to allow comparison between multiple farms under one ownership structure and of individual farms against the wider Vetlife client database.
- Bull breeding soundness exams (physical, semen and libido).
- Total milk quality reviews.

Vetlife's services include

- Calf disbudding from 2 weeks of age and extra teat removal.
- R1 and R2 heifer weighing and health management.
- Milking plant audits and problem solving as well as training in efficient and effective milking procedures.
- Body condition scoring and independent management.
- Teat sealing.
- Staff training from basic to specialist levels.
- Leptosure and self vaccination of stock.
- Healthy Hoof modules / In Calf / Smart Samm.
- Large-scale PDing on the platform and immediate data entry through PDAs.
